Video Demonstration Assistive Software Transcript

This will be a short video demonstration on an Assistive Software called Dragon Naturally Speaking 12. The version used in this demonstration is Dragon Naturally Speaking 12 Premium. There are other versions available, such as home, professional, and legal. The features vary by each software. More information is available on http://www.nuance.com/. The software is fairly easy to use in the event of a learner may require to use the software as an assistive technology. Once the user activates that button, the user will be able to speak into an attached microphone and the software will convert the text into words without the use of a keyboard.

In just a moment, I will open Microsoft Word and provide a short demonstration on how this software works. A normal user will type on a keyboard; however, a user is unable to type maybe because of a visual impairment will need an assistive software in order to type. Dragon Naturally Speaking 12 will help this user say what they want. I will now turn the microphone on and provide a demonstration on how this software works. "This is a video demonstration of Dragon Naturally Speaking 12." "Capitalize Naturally." "Capitalize Speaking." "Period." There are many features available with this software that the assistive user can utilize to speak their words without the need of a keyboard.
