

Overall, my target audience enjoyed my website and felt it was effective in instruction. Most of the responses were in the “exceeds expectations” or “far exceeds expectations.” One individual would have preferred a drop-down menu for the steps; however, I felt a Spry menu would take away from the pre-existing aesthetic appearance of the roll-over buttons I created. Though not mentioned in the results below, a face-to-face conversation with one of the individuals yielded that they had issues with java and flash; however, they found it helpful for my help tips on the left side of each page. They still were not able to view the java pop-ups or flash modules on their own computer as they mentioned they were not completely technology savvy. They were able to view the elements on a different computer at their home.
